

Use your land to harvest the sun

Use your land for photovoltaic systems –
with us as an experienced partner at your side.

We are looking for your land!

Do you own land that is suitable for the installation of photovoltaic systems? Then let us do business with you as a partner – lease us your land and we will take care of the rest.

We are a medium-sized German company that has been planning, realising and managing solar projects both in Germany and worldwide since 2007– always on an equal footing with our clients.

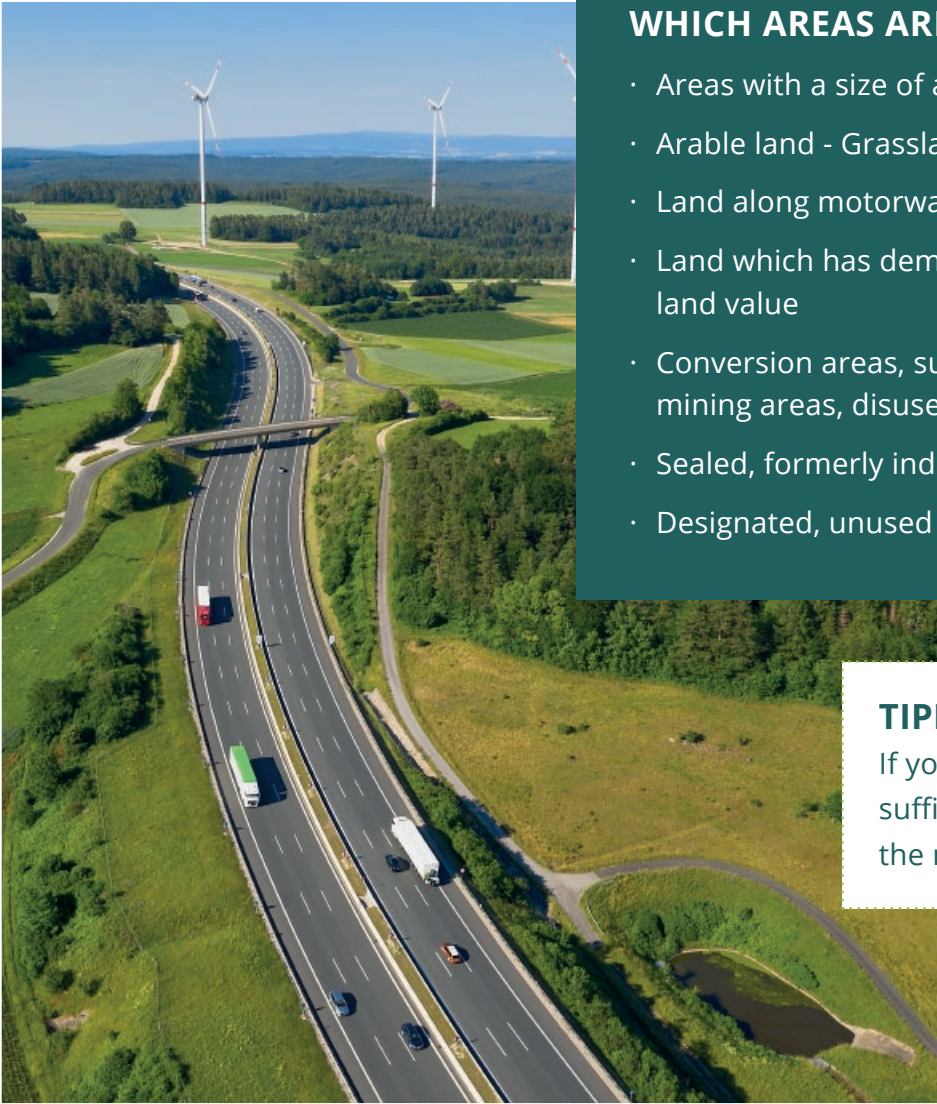

Take a look at our references and see for yourself:

ADVANTAGES OF COOPERATION WITH EEPRO

- We work proficiently and reliably – with immediate start of implementation.
- Complete planning and handling by us, i.e. no work and no risk for you.
- We offer various lease models: Fixed or revenue-dependent, one-off or regular payments for 30 to 40 years.

WHICH AREAS ARE ELIGIBLE?

- Areas with a size of at least 1 ha
- Arable land - Grassland - Commercial - Industrial
- Land along motorways and railways
- Land which has demonstrably low yield or poor land value
- Conversion areas, such as landfills, former open-cast mining areas, disused military bases, demolition sites
- Sealed, formerly industrially used land
- Designated, unused commercial areas

TIPP

If your own acreage is not quite sufficient, ask the owner of the of the neighbouring property.

Make your contribution to the energy transition!

GOOD TO KNOW!

- The land use remains ecological: only 0.5 to 1% of the land is sealed.

Experience our fast and professional handling

PROJECT PROCEDURE IN 6 STEPS

- Step 1:** Land enquiry
- Step 2:** Lease agreement
- Step 3:** Submission of the grid request
- Step 4:** Presentation of the construction project to the municipality
- Step 5:** Application for urban land use planning with the municipality
- Step 6:** Building permit and realisation of the PV system

Completed project in Boizenburg, Germany
